

IN THE CLAIMS

The following is a complete listing of revised claims with a status identifier in parenthesis.

LISTING OF CLAIMS

1. (Currently Amended) A connection device comprising:
one or more processing units; and
an optical switch adapted to connect at least one of the units to one or more non-amplified optical signals based on a characteristic of each signal.

2. (Original) The device as in claim 1 wherein the at least one unit comprises a Raman pump.

3. (Original) The device as in claim 1 wherein the at least one unit comprises an optical-to-electrical-to-optical regenerator.

4. (Original) The device as in claim 1 wherein the at least one unit comprises a dispersion equalization/compensation unit.

5. (Original) The device as in claim 1 where the at least one unit comprises a performance monitor.

6. (Currently Amended) A router comprising:
one or more processing units; and
an optical switch adapted to connect at least one of the units to one or
more non-amplified optical signals based on a characteristic of each signal.
7. (Original) The router as in claim 6 wherein the at least one unit
comprises a Raman pump.
8. (Original) The router as in claim 6 wherein the at least one unit
comprises an optical-to-electrical-to-optical regenerator.
9. (Original) The router as in claim 6 wherein the at least one unit
comprises a dispersion equalization/compensation unit.
10. (Original) The router as in claim 6 wherein the at least one unit
comprises a performance monitor.
11. (Currently Amended) A method for providing an optical, service-
enabled connection comprising:
connecting at least one of a number of processing units to one or more
non-amplified optical signals based on a characteristic of each signal.

12. (Original) The method as in claim 11 wherein the at least one unit comprises a Raman pump.

13. (Original) The method as in claim 11 wherein the at least one unit comprises an optical-to-electrical-to-optical regenerator.

14. (Original) The method as in claim 11 wherein the at least one unit comprises a dispersion equalization/compensation unit.

15. (Original) The method as in claim 11 wherein the at least one unit comprises a performance monitor.
